16. Specific lobbying issues

Americans consume aluminum primarily in transportation (31 percent), containers and packaging (23 percent), and building and construction (14 percent). The advances in the automotive aluminum market are helping Americans drive better-performing cars that in turn reduce CO2 emissions and save fuel consumption. Closed-loop recycling of aluminum beverage cans—all recycled cans are used in new can sheet--allows energy conservation and high recycled content. More than two-thirds of all aluminum ever produced is still in use through continuous aluminum recycling.
